CHAIR, COUNCIL OF SECTIONS, ZONE IV
Geological Sciences and Engineering

Dear ASEE Authors,

We are excited to welcome you to the American Society for Engineering Education's Annual Conference and Exposition. We are on track to have the largest conference program ever with over 2400 papers scheduled to be presented. However, the ASEE Board of Directors understands that authors may have concerns about travelling to Canada for the conference.

If you have a concern related to your ability to attend the ASEE Annual Conference in person, please reach out to the program chair(s) of the division(s) you've submitted papers to. To find this information:

1. Visit [NEMO](#)
 - a. If necessary, navigate to Paper Management
2. Identify the division name associated with each of your papers.
 - a. The division name will appear next to the paper number.
3. The program chair for each division is in the [Program Chair List in NEMO](#).

Program Chairs have been given discretion to offer various accommodations based on their division's program and resources. If you do not receive a satisfactory response from the program chair, you can reach out to the Vice President of Professional Interest Councils, Kaitlin Mallouk (mallouk@rowan.edu) who will work to address your concerns.

We hope that, despite the current challenges, we will see you in Montreal. While we will miss those who are unable to attend, we warmly welcome your contributions via the variety of alternative options we were able to offer.

Sincerely,

Kaitlin Mallouk, Vice President of Professional Interest Councils
on behalf of the ASEE Board of Directors
